Dear Valued Customer,

Subject: AMETEK Programmable Power AS5553/DFAR 252-246-7007/252-246-7008 Compliance

AMETEK Programmable Power is pleased to announce full compliance to AS5553 and DFAR Clause 252-246-7007/252-246-7008 Anti-Counterfeit mitigation requirements.

This compliance allows AMETEK to accept purchase orders marked with this requirement with no for exception. Steps for purchase order submission & lead time mitigation are below for easy reference.

Simple steps for ordering compliance assured product:

1. Customer will submit purchase order with required compliance clause for counterfeit parts mitigation to AMETEK.
2. AMETEK will plan each order.
3. As a default, your product will be built with 100% franchise components at standard lead times. In the event of an extended lead time for franchise parts, AMETEK will offer options for franchise and qualified non-franchise lead times for each option.
4. Customer will choose which path is acceptable based on lead time and application requirements and provide written confirmation to AMETEK.
5. AMETEK will build based on this written decision at quoted lead time.

This process allows AMETEK to both comply with all mandated requirements while also allowing customer flexibility in the event of lead time constraints and demand requirements to ensure the best possible solution on every order. Adoption of this process exemplifies AMETEK's continued commitment to the highest levels of product quality and reliability, and a sustained focus on continual customer focused improvement.

Sincerely,

Shawn M. Smith

Vice President / Business Unit Manager
